DETAILED ACTION

Claim Objections

The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 8-20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 5,786,814 to Moran et al.

Moran discloses a computer controlled display system using correlated graphical and timeline interfaces for controlling the replay of temporal data. According to the method presented in the system of Moran, events, such as important points or a change of scene, are indexed (col. 5 lines 29-36). The information representing these events consists of a start time, a duration, a type, and properties, and are stored separate from the video, audio, etc. data (col. 6

Art Unit: 2851

lines 63-67). These events are then represented to a user in the form of a graphical interface so as to provide the user with easy access (col. 5 line 59-col. 6 line 1). These graphical interface, representing specific events, provide a means for extracting information about the events.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,360,234 to Jain et al. discloses a video cataloger system with synchronized encoders.

U.S. Patent No. 5,519,828 to Rayner discloses a video editing operator interface for aligning timelines using a computer.

U.S. Patent No. 6,239,801 to Chiu et al. discloses a method and system for indexing and controlling the playback of multimedia documents.

U.S. Patent No. 5,640,601 to Peters discloses an apparatus and method for indexing frames as the images are being compressed using signal from the data digitizer to notify the host unit.
